- ✓ **Retractable two position cup holder**
- ✓ **Rugged construction from 1/2" stock**
- ✓ **Simple installation. Instructions included.**

### **Console Options**

- ✓ **Key Lock**
- ✓ **Audio Systems Foundation**

During an extended road-trip in upstate New York, Tony Revetti (SP 1085) realized there was something he needed in his Mk III. He built a custom fit, high quality center console incorporating key features for driver and passenger, as well as providing additional storage for the odds and ends that tend to litter our cars during longer road-trips.

This excellent console is now available to all owners through the Second Strike Store. The console offers a striking OEM appearance. It incorporates a contour matching leather armrest that is professionally dye-matched to the Mk III's black leather. A smooth transition to the interior is provided by matching the console's front/ rear

angles with that of the Mk III. Original style carpet material is utilized on front and side surfaces to enhance the OEM appearance of the entire assembly.

*Hinged Lid with Internal Storage*

Although out of sight, the console's interior is also ready to perform. Components such as the self-aligning magnetic latch system, heavy duty stainless steel hinge assembly and multiple applications of vinyl coating ensure the interior can standup to the rigors of every day use.

The console is 16" long, 6" wide and 6.5" high with approximately 250 cubic inches of storage.

*Console with 2.5 lb Fire Extinguisher*

A step down at the rear of the console provides space for a fire extinguisher to be mounted on the rear bulkhead if you so desire. Fire extinguishers using the Halotron agent are recommended such as the HalGuard HG100C (1.4 lb, 10" high) and the HalGuard HG250C (2.5 lb, 15" high).

The Console works well with the original shifter and with all the Jordan Shifters.

If you ride with the tonneau cover folded behind the seats, there is room for the folded tonneau as well.

The console is attached with either industrial grade Velcro (included) or screws (included). Complete installation instructions are included.

## Standard Cup Holder

The left tab raises the lid. The right tab slides out to provide a two position cup holder.

*Two Position Cup Holder*

## Optional Features

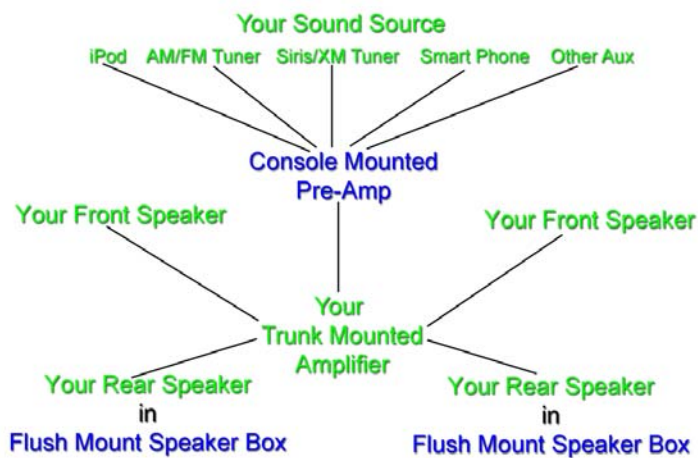

### Optional Key Lock

An optional key lock for the console lid, shown in the initial photo, can be installed with the initial console order. When ordered with the Console Mounted Pre-Amp, the key lock is on the left side of the console.

### Optional Audio System Foundation

The console mounted Audio Systems Foundation provides base for an integrated audio system.

#### Components

The Second Strike Store offers the following optional Mk III specific custom components as the foundation for your audio system:

- ✓ Console
- ✓ Console Mounted Pre-Amp
- ✓ Flush Mount Rear Speaker Boxes

To which you add your choice of components available from your local electronics or car audio store or online:

- ✓ Trunk mounted amplifier
- ✓ Front speakers
- ✓ Rear speakers
- ✓ And of course, the sound source

### Console Mounted Pre-Amp

The Console mounted pre-amp can be added at the time of Console purchase.

*Audio System Controls*

The controls are mounted on the front of the console and can be easily used while the car is in motion. Controls include front-rear fader, volume, and bass, mid-range, and treble adjustments.

### Flush Mount Speaker Boxes

The Flush Mount Speaker Boxes are designed specifically for the Mk III to work effectively behind the seats with no cutting of the bulkhead required. They are covered with carpet matching the interior carpet giving them a factory installed appearance. The speaker boxes mount to the rear bulkhead behind the seats with two small screws per box (recommended) or Velcro.
